MESHTECH's Commitment

At MeshTech Solutions, we are passionate about creating a world in which intelligent software improves millions of lives. We build, maintain and support business critical applications for our clients.

We are driven by a simple goal: deliver high-quality software to our clients, and ensure projects run smoothly, strategically, and predictably. Building the best app possible is critical and so is the process it takes to get there. ***That's where we come in.***

Just Like how an idea needs effort to become a reality, we at MeshTech Solutions understands client requirement and make it a reality. Utilizing our years of expertise, we strive to build much more robust and trendsetting apps with clients.

Technology, Innovation & Support

Technology leadership is the most successful strategy to challenge competitors and consolidate our position since business and technology work hand in hand. Our firm's belief in this synthesis has motivated and enabled us to deliver solutions with a decisive competitive advantage.

In our each project, we emphasize on innovation. Our structured team works with a methodology and knowledge to innovate and deliver excellent services.

The Company

We aim to be the best at what we do. MESHTECH has a dream of evolving into a Global IT Company, ensuring that the solutions being delivered include best practice in I. T. with the chosen area of technology.

- We operate with complete focus to Maximize customer satisfaction.
- Develop and encourage an environment of mutual respect within company and extending it beyond to clients.
- Encourage commitment and personal learning of workforce.

We are proud to have built our organization on the strong pillars of integrity, honesty, and self-respect.

Mission

To produce excellent services in the field of IT Services and Consultancy with maximum efforts driven towards customer satisfaction.

Vision

To build upon a reputation of being one of the most innovative IT Solution and Service provider. We believe in doing our work in the most efficient way with robust and structured methodology, with gradual evolution from hard-work to smart-work culture, at client's end also.

Our Services

MESHTECH delivers quality and timely solutions and services at a price that make our clients smile. MESHTECH focuses on offshore development at our development centre in Karachi, Pakistan. This allows us to scale up rapidly (leveraging on the plentiful supply of talent and thus cutting down on execution time) at costs that are on an average much cheaper.

MESHTECH is your one stop partner where you can outsource all your support services with complete peace of mind about quality and reliability. MESHTECH Software Solution's strength lies in understanding the client's business processes, culture, vision and goals across the industry segments and offering client oriented solutions which are highly reliable, creating customer comfort.

MESHTECH with its vision of quality and innovation has been successful in catering the needs of those who seek our assistance in following areas of IT enabled services:

- 1 Business Software Solutions/ Business Applications
- 2 Web Solutions
- 3 Mobile Application Solutions
- 4 Graphic Solutions
- 5 Quality Assurance & Testing
- 6 Application Maintenance & Support
- 7 Cloud Platform Management

Business Software Solutions

MESHTECH Solutions has developed a number of products and MIS applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the "on-time and on-budget" delivery of software. Our applications come in all sizes, be it a one-table database, or a massive client-server application. The creation of complete database applications is yet another field that we specialize in.

Whether your goals are to shorten development cycles or simply reach as many users on as many devices as possible, more companies are relying on the web as a platform for deploying their most visible and mission-critical applications. MeshTech's web application development team has a deep and broad understanding of the newest and The best tools to help you deliver first-class web experiences to your users.

We have a specialized team of Web developers. Our team uses the latest technology to fulfill your business requirements and provide you with customized solutions that will be helpful in the growth and success of your business.

Our Services

We offer:

- Interactive Application Development
- Custom Application Development/Maintenance
- MIS and ERP Solutions & Support

Interactive Application Development

Interactive Application Development (iAD) is about harmonizing art with technology. This business division of MESHTECH Software Solution complements the client's requirement of online and desktop.

A strong team of software professionals empowers the application development capability of iAD at MESHTECH Software Solutions. The applications developed ranges from Web-stores, online service retailing to enterprise information systems.

Custom Application Development/ Maintenance

It is a well known fact that some of the ready-made, packaged applications have failed to meet the requirements of the customers because of their unique needs and differing business practices and processes. In addition, prohibitive cost of implementing a packaged application and the maintenance thereafter becomes an unwelcome perspective.

We have experienced I.T. Consultants for Project analysis, formulation and concept planning, right up to project management and installation. We develop customized Software that is completely based on user's requirement with GUI (graphical user- friendly interface) on any of the mentioned platform / languages.

MIS and ERP Solutions & Support

We offer customized low cost solutions to industries based on open standards, contemporary technologies and maintenance support. While incorporating the best of business practices, we do take special care of the customer requirements.

ERP Solutions include the development of software in a distributed model. Each phase is uniquely defined and executed. After unit, and system testing the product is then sent to the client for acceptance testing. We have satisfied customers find the solutions user-friendly, flexible, and comprehensive.

Our Services

Web Solutions

At MeshTech, we understand that the best mobile experiences require a robust backend foundation. From the earliest stages of product conception and strategy, our API architects are focused on designing a server-side solution tailored to the specific requirements of your product.

Graphic Solutions

Graphics Design

We create Professional Eye-catching graphics design for marketing and branding purpose including logo designing, print & brochure designs.

Each Client is different with his own ideology and vision, so should be his designs. Having a variety of design solutions, we lend our services for:

Logos, Brochures, Advertisements, Corporate Profile Presentation, Product Catalogue, Training/Tutorials Presentation.

UX Design

Exceptional user experience design is crucial to the success of any digital product, and the primary driver of repeat usage. Creating an elegant and functional UX that represents your brand and business goals requires a keen awareness of user needs, product business drivers, technical capabilities of platforms, and best practices in usability.

Our Services

Quality Assurance & Testing

All the software solutions developed undergo following cycle of testing:

Requirements Analysis:

Testing begins in the requirements phase of the software development life cycle.

Design Analysis:

During the design phase, testers work with developers in determining what aspects of a design are testable and under what parameter those tests work.

Test Planning:

Test Strategy, Test Plan(s), and Test Bed creation.

Test Development:

Test Procedures, Test Scenarios, and Test Cases & Test Scripts to use in testing software.

Test Execution:

Testers execute the software based on the plans and tests and report any errors found to the development team.

Test Reporting:

Once testing is completed, testers generate metrics and make final reports on their test effort and whether or not the software tested is ready for release.

Retesting the Defects

In this cycle applications are passed through following levels of testing:

- Component testing tests the minimal software item that can be tested.
- Component integration testing exposes defects in the interfaces and interaction between integrated components.
- System testing tests an integrated system to verify that it meets its requirements.
- Acceptance testing allows the end-user or customer to decide whether or not to accept the product.
- After modifying a software, either for a change in functionality or to fix defects, a regression test re-runs previously passed tests on the modified software to ensure that the modifications haven't unintentionally caused a regression of previous functionality.

Our Services

Application Maintenance & Support

We have years of experience in executing maintenance projects. Our team of experienced consultants has been successfully managing maintenance projects of local clients as well as offshore ones.

The quality of product deployment, training and support has everything to do with customer success and satisfaction. We offer annual maintenance plans which are tailor-made as per the client's requirement. If required we depute technical team which works at the client site for the system execution or support as per requirement.

Cloud Platform Management

We help your web/mobile business running smoothly, from shared server to Amazon AWS. Whether you are a cloud user or just starting up or need consultation to improve your business's cloud strategy, we have the expertise based on your business needs. We will manage your cloud, boost its performance, harden its security & equip it with the nuts & bolts you need to keep your business running smooth!

Our Products

SaltERP

SaltERP is an integrated information system for companies' resource management to optimize and streamline the internal business processes. SaltERP is a multi-module system, specially designed to standardize the productive or decision-making processes by introducing the best practices specific to each business sector.

Currently, SaltERP supports the operations of the many organizations in areas such as distribution, retail, sales and purchasing, manufacturing, transportation, construction or services.

SaltERP has a modular, flexible and configurable architecture, designed for the optimization of the management of complex organizations, regardless of their size. The solution offers a unique view over the entire activity, reduces operational costs, integrates workflows and increases the company's agility.

Trading (Stock and Inventory)

Purchases sub-module covers all the basic features of an integrated information system designed for the automation and optimization of supply and purchasing processes, starting from the item purchase request, and finalizing with the purchased items management. The Purchases sub-module is perfectly adaptable to the specific of each company, regardless its size or complexity.

Sales sub-module is an important component of SaltERP integrated system, specially designed to ensure a correct and efficient management of the sales operations specific to each business field. The module automates and centralizes the requests for quotations, offers, invoices, orders, notices, discount or promotion campaigns, customers' types, sales areas or delivery areas.

Our Products

The **Inventory sub-module** has the role to provide efficient monitoring and management of complex stocks with raw materials, materials, end products and unfinished goods, as well as inventory goods. Inventory management module is perfectly adaptable to the specific of any company, regardless its size, complexity or business field.

GL (Accounts)

GL/Accounting module is a robust solution that collects all data from the SaltERP operational modules and integrates them into an accounting form. Regardless the structure, size, international environment, language, currency or the company's chart of accounts, the module has the capability to provide centralized financial data, essential information about the financial status of the company or about the results and the progress of the financial performance over time.

Any organization, regardless of its size or industry, wants to control the financial situation thoroughly and permanently. This module provides support in controlling the cash inflows and outflows within the organization. The objective of this module is to inform accurately and correctly the company's management and to maintain an optimal level of cash flow.

Our Products

Human Resource Management (With Payroll and Time Attendance)

HRMS module helps to revolutionize a workplace. The automation of repetitive and time consuming tasks associated with human resource management, frees up some of the company's most valuable employees and allows the focus to shift to culture, retention, and other highly impactful areas.

HRMS module helps the HR department in tracking employee histories, skills, abilities, attendance, salaries and accomplishments. Replacing certain processes with various levels of HRM systems can distribute information management responsibilities so that the bulk of information gathering is not delegated strictly to HR. By allowing employees to update personal information and perform other tasks, information is kept more accurate and HR professionals are not bogged down.

Each module performs a separate function within the HRMS that helps with information gathering or tracking.

CRM (Customer Resource Management)

Companies use SaltERP CRM module to manage and analyze customer interactions and data throughout the customer lifecycle, with the goal of improving business relationships with customers, assisting in customer retention and driving sales growth. The CRM module is designed to compile information on customers across different channels mainly with respect to points of contact between the customer and the company. SaltERP CRM module also gives customer-facing staff detailed information on customers' personal information, history, preferences and concerns.
